Reply to Office Action of 04/07/2005 Amendment Dated: July 5, 2005

Appl. No.: 10/614,611 Attorney Docket No.: CSCO-033/7051

Listing of Claims

- 1 (Currently Amended): A method of supporting a user to access a service, said method being performed in a service selection gateway (SSG), said method comprising:
- receiving in said SSG, data representing a plurality of switching points, each of said plurality of switching points comprising a time point;
- counting in said SSG, a traffic volume from or to each of said plurality of switching points; and
 - sending from said SSG, an accounting record containing said traffic volume.
- 2 (Currently Amended): The method of claim 1, wherein each of said plurality of switching points comprises a time <u>point</u> at which a tariff changes to access said service.
 - 3 (Original): The method of claim 2, wherein said traffic volume comprises an aggregate count of data transferred.
 - 4 (Original): The method of claim 2, wherein said traffic volume comprises a marginal count from a previous switching point, said accounting record further comprising an aggregate count.
 - 5 (Original): The method of claim 4, further comprising maintaining a marginal counter and an aggregate counter to count said marginal count and said aggregate count respectively.
- 1 6 (Original): The method of claim 4, further comprising:
- 2 maintaining a single counter to count said aggregate count,
- storing said aggregate count in a variable at each of said plurality of switching points; and
- 5 computing said marginal count at a time of generating said accounting record by 6 subtracting said variable from said aggregate counter at said time.

Reply to Office Action of 04/07/2005 Appl. No.: 10/614,611 Amendment Dated: July 5, 2005 Attorney Docket No.: CSCO-033/7051 1 7 (Original): The method of claim 4, wherein said accounting record is sent at least once in every tariff duration, wherein said tariff duration is between successive ones of 2 3 said plurality of switching points. 8 (Original): The method of claim 7, wherein said plurality of switching points are 1 2 specified for each day. 9 (Original): The method of claim 4, wherein said service is billed according to a 1 2 post-paid model. 10 (Original): The method of claim 4, wherein said traffic volume is associated with 1 2 a session initiated by said user. 11 (Currently Amended): A machine readable medium carrying one or more 1 sequences of instructions for causing a SSG to support a user to access a service, wherein 2 execution of said one or more sequences of instructions by one or more processors 3 contained in said SSG causes said one or more processors to perform the actions of: 4 receiving in said SSG, data representing a plurality of switching points, wherein 5 each of said switching points comprises a time point; 6 counting in said SSG, a traffic volume from or to each of said plurality of switching 7 points; and 8 sending from said SSG, an accounting record containing said traffic volume. 9 12 (Currently Amended): The machine readable medium of claim 11, wherein each 1 2 of said plurality of switching points comprises a time point at which a tariff changes to 3 access said service. 13 (Original): The machine readable medium of claim 12, wherein said traffic 1

volume comprises an aggregate count of data transferred.

3	means for receiving data representing a plurality of switching points, wherein each	
4	of said switching points comprises a time point;	
5	means for counting a traffic volume from or to each of said plurality of switching	
6	points; and	
7	means for sending an accounting record containing said traffic volume.	
1	22 (Currently Amended): The SSG of claim 21, wherein each of said plurality of	
2	switching points comprises a time point at which a tariff changes to access said service.	
1	23 (Original): The SSG of claim 22, wherein said traffic volume comprises an	
2	aggregate count of data transferred.	
1	24 (Original): The SSG of claim 22, v	wherein said traffic volume comprises a
2	marginal count from a previous switching point, said accounting record further comprising	
3	an aggregate count.	
1	25 (Original): The SSG of claim 24, furt	her comprising means for maintaining a
2	marginal counter and an aggregate counter to count said marginal count and said aggregate	
3	count respectively.	
1	26 (Original): The SSG of claim 24, furth	er comprising:
2	means for maintaining a single counter to	count said aggregate count;
3	means for storing said aggregate count	in a variable at each of said plurality of
4	switching points; and	
5	means for computing said marginal coun	t at a time of generating said accounting
6	record by subtracting said variable from said agg	regate counter at said time.
1	27 (Original): The SSG of claim 24, when	rein said accounting record is sent at least
2	once in every tariff duration, wherein said tariff duration is between successive ones of	
3	said plurality of switching points.

Amendment Dated: July 5, 2005

Attorney Docket No.: CSCO-033/7051

- 28 (Original): The SSG of claim 27, wherein said plurality of switching points are specified for each day.
- 1 29 (Original): The SSG of claim 24, wherein said service is billed according to a post-paid model.
- 1 30 (Original): The SSG of claim 24, wherein said traffic volume is associated with 2 a session initiated by said user.
- 1 31 (Currently Amended): A service selection gateway (SSG) supporting a user to access a service, said SSG comprising:
 - a tariff block receiving data representing a plurality of switching points, wherein each of said switching points comprises a time point;
- a forwarding block forwarding a plurality of packets related to said user,
 - an accounting block counting a traffic volume from or to each of said plurality of switching points according to said plurality of packets; and
- 8 an outbound interface sending an accounting record containing said traffic volume.
- 32 (Currently Amended): The SSG of claim 31, wherein each of said plurality of switching points comprises a time point at which a tariff changes to access said service.
- 1 33 (Original): The SSG of claim 32, wherein said traffic volume comprises an aggregate count of data transferred.
- 34 (Original): The SSG of claim 32, wherein said traffic volume comprises a marginal count from a previous switching point, said accounting record further comprising an aggregate count.
